

320-PED Passive OSP Pedestal

Specs and Techs: 320-PED

Description:

The 320-PED Pedestal incorporates strength, rigidity, and security all in a high-performance designed pedestal. A Universal rear bracket is mounted to the back of the pedestal, for a generous fiber bend radius, routing, and future application growth.

Features and Benefits: 320-PED

- Re-enterable and re-usable.
- Universal Mounting bracket which accommodates: Distribution Splice Enclosures or
- Open Architecture with Splice Trays and (4) SC/APC Adapters.
- Up to 48 single fuse splices in a single splice tray.
- Self-Supporting base eliminates the need for supplemental mounting stakes.
- Cable access for future expansion.
- Rodent proof lid and collar.
- Separate dome for 360° access permits complete access to all cable and equipment.
- Lid to Base locking bolt mechanism.
- Available in colour coded variants to customer requirements.
- Optional ground/bond bracket.
- 320-PED can go to as low as -40°C (-40°F) in extreme conditions.
- Earthing Terminal for Ground Wire trace devices.
- Unit can be retrofitted to an existing 320T-S Access Point.
